

Cloud Hosting

Database servers and management

Snackhost uses two clusters for mysql and one for postgresql databases.

Used hosts are:

mysql1.snackhost.eu

mysql2.snackhost.eu

pgsql1.snackhost.eu

We provide web access, for managing your databases, at <https://db.snackhost.eu/>
You can choose phpMyAdmin or Adminer for mysql databases and pgMyAdmin for postgresql database.

Unique solution ID: #1023
